Today's Topics

1

Unlocking insights in a disparate healthcare data ecosystem

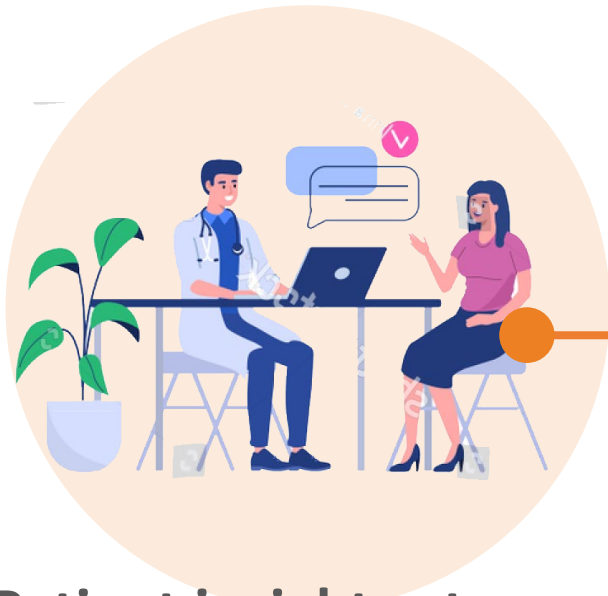

2

Enabling insights at the point of care

3

Driving operational and compliance benefits from prospective workflows

Aligning Risk & Quality at the Point of Care

Patient insights at the point of care

AI is the enabler to make this happen

Industry readiness for alignment

Data is Not the Missing Link

Healthcare data
overflow

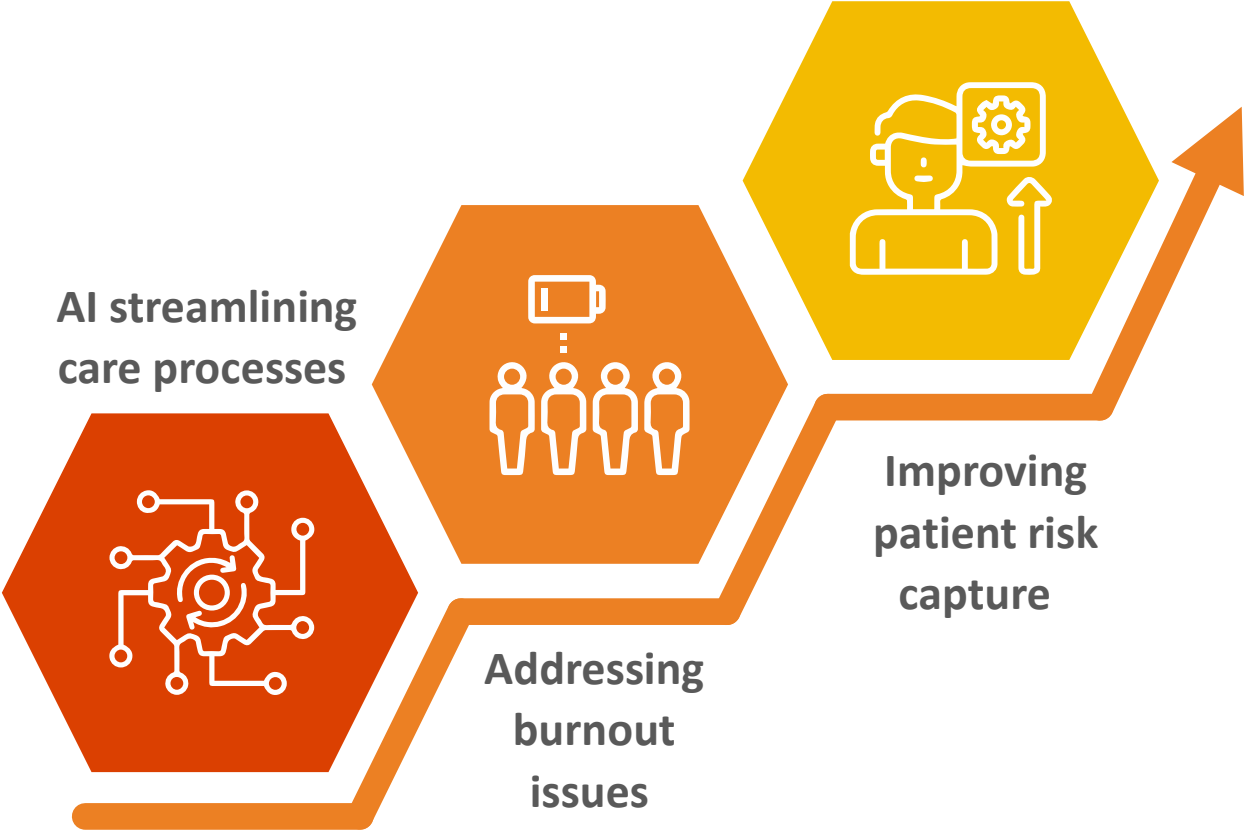

Challenges with
disparate systems

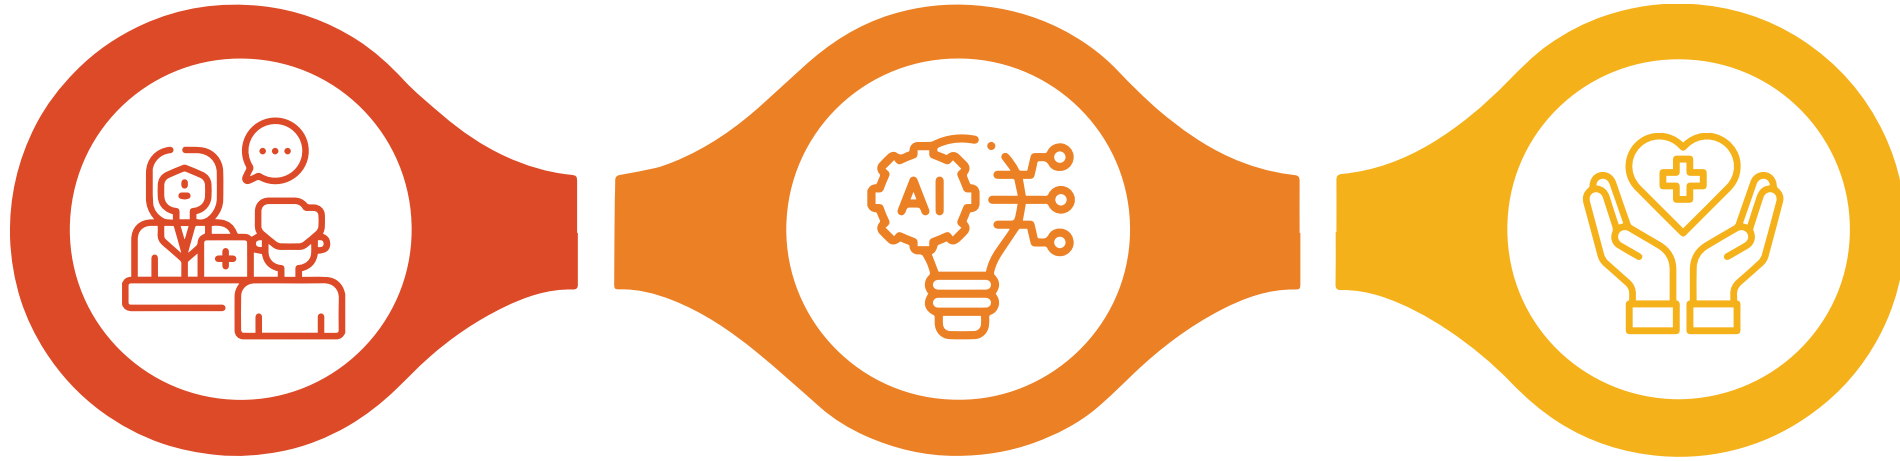

AI role to create
patient-centered
insights

Improving Provider Efficiency & Effectiveness

Improving Provider Satisfaction

Comprehensive patient data at point of care

AI providing possible diagnoses

Better care, improved documentation

- ✓ Improved patient health
- ✓ Better documentation
- ✓ Accurate reimbursements

Embedding Compliance Into the Process

AI-enabled compliance
at point of care

Claims submissions
inherently compliant

Enhancing audit
readiness

Population-level Visibility

Integrating claims and clinical data with AI

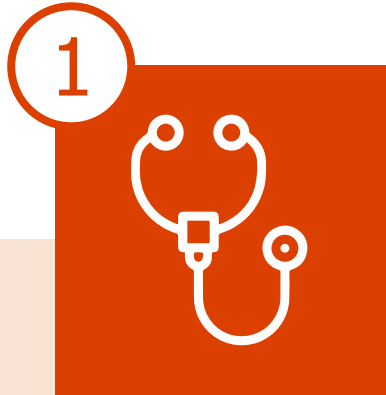

Facilitating analysis for risk stratification

Enhancing population health management

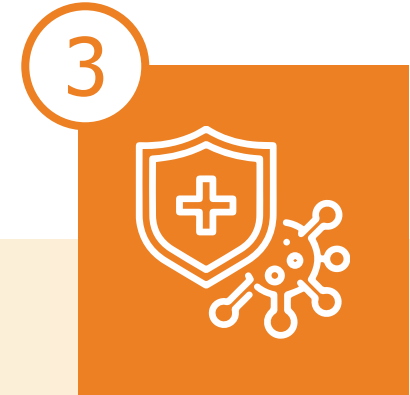

From Intervention to Prevention

Equipping
providers for
proactive care

Patient data
revealing trends

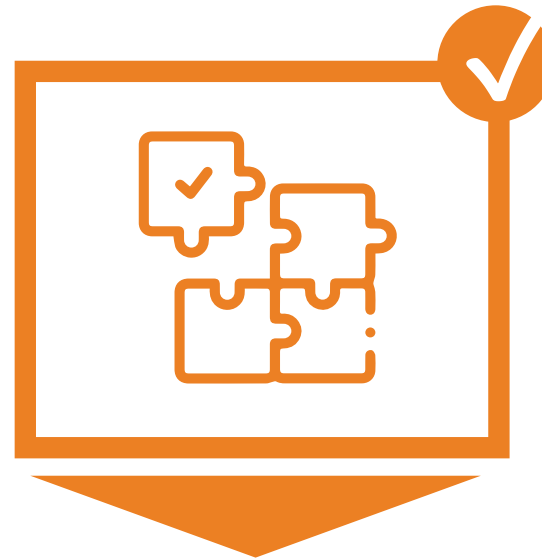

Shifting towards
preventive care

Best Practices, Next Steps?

**Steps for AI
implementation at
Point of Care (POC)**

**Purpose-fitting
AI for VBC, Risk,
and Quality**

**Ensuring
meaningful AI
application**

Key Takeaways

1

AI can align Risk and Quality

2

Integrated, curated insights at the point of care

3

Significant improvements in outcomes
