

Strategies to Improve Data Quality for your Organizations Value-Based Care Program

Presented By:

Alan Sun, *VP of Product* - Apixio

THE RISE
ASSOCIATION

THE RISE
ASSOCIATION

We are a network of health care professionals addressing the challenges posed by the emerging landscape of value-based care and government health care reform.

OUR MISSION

Our mission is to provide a community for like-minded professionals to come together for networking, education, and industry collaboration to stay ahead and advance their careers.

ONE ASSOCIATION

ASK YOUR QUESTIONS IN OUR DISCUSSION BOARD

Illustrative VBC Program Implementation

Risk Adjustment

capture complete and accurate member conditions

Quality

address member care needs and report on those services

Utilization Management

appropriate use of high-quality, cost-effective care

Measurement

assess effectiveness of your VBC program

Sources of Data Quality Issues

Coding and
documentation
practices

Disparate
systems

Data
availability

Impact of Data Quality Issues

Risk Adjustment

revenue impact and
compliance risk

Quality

inadequate care and
unnecessary
encounters

Utilization Management

administrative waste,
care delays, increased
care costs

Measurement

lack of visibility and
missed opportunities
for optimization

Strategies to Improve Data Quality

Key Strategies

Coding and
documentation
practices

Disparate
systems

Data
availability

Interoperability

Insights

Actionability

Interoperability

Why

- Connects disparate systems
- Increases data availability and completeness
- Enables data delivery at the right time and place

How

- Embrace the messiness
- Prioritize problem areas
- Leverage Provider / Payer partnerships
- Engage technology vendors for the heavy lifting

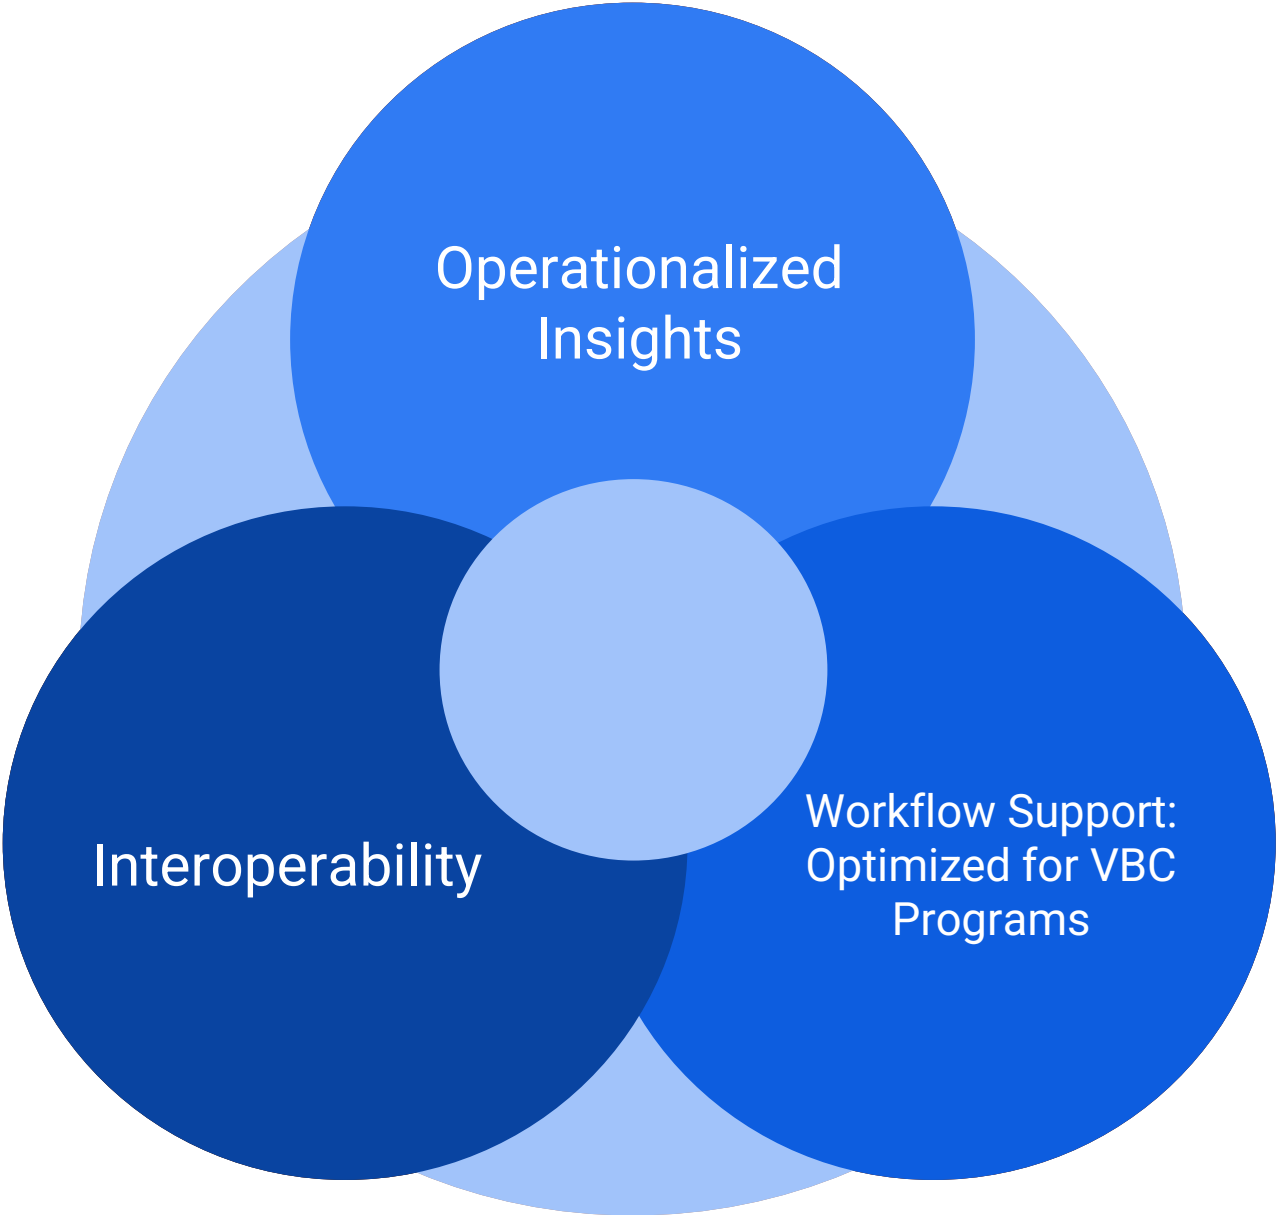

Insights

Work backward

Consider all
available data

Actionability

What Next?

1. Assess current state
2. Prioritize problem areas
3. Leverage vendors and partners
4. Take an iterative approach

THANK YOU
